

SignalSure 140

High power SMD solution

SignalSure 140 is a compact, surface-mount, high power LED signaling solution that delivers an elevated standard of light output, flux density, and color uniformity. SignalSure's robust design structure, coupled with high performance specifications, ensures high quality and reliability.

SignalSure 140 is available in the following color wavelengths:

- Red Orange (617nm)
- Red (623nm)

FEATURES AND BENEFITS

- Higher drive current than competition to enable increased flux performance
- Low thermal resistance for better hot lumen performance
- Standard PLCC4 package for cost efficiency and ease of production
- IEC-60810 qualified

PRIMARY APPLICATIONS

- CHMSL
- Stop/Tail

General Product Information

Product Test Conditions

SignalSure 140 LEDs are tested and binned using a 20 ms monopulse (MP) at 140 mA drive current, junction temperature, T_j , of 25 °C.

Part Number Nomenclature

Part numbers for SignalSure 140 follow the convention below:

A 1 D K – **B C C C** L 8 4 **D E F G** 0 0

Where:

- B** – designates color (O = Red Orange and R = Red)
- C C C** – designates minimum dominant wavelength (612 = 612 nm, 620 = 620 nm)
- D** – designates minimum flux bin (See Product Bin and Labeling section)
- E** – designates the flux bin range (3 = 3 subsequent flux bins including the minimum bin)
- F G** – designates forward voltage range in which F is the minimum V_f bin and G is the maximum V_f bin (See Product Bin and Labeling Definitions section)

Therefore, the following part number is used for a SignalSure 140 Red Orange, 612 nm minimum wavelength, luminous flux range of 20.6 lumens to 32.2 lumens and forward voltage range of 1.90 volts to 2.50 volts:

A 1 D K – **O 6 1 2** L 8 4 **N 3 A D** 0 0

Environmental Compliance

Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. SignalSure 140 is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Performance Characteristics

Product Selection Guide

Table 1. Product selection for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25\text{ }^{\circ}\text{C}$

COLOR	DOMINANT WAVELENGTH ^[1,2] (nm)	PART NUMBER
Red Orange	617	A1DK - O612L
Red	623	A1DK - R620L

Notes for Table 1:

1. Dominant wavelength is derived from the CIE 1931 Chromaticity diagram and represents perceived color.
2. Lumileds maintains a tolerance of $\pm 0.5\text{nm}$ for dominant wavelength measurements.

Optical Characteristics

Table 2. Typical optical characteristics for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25\text{ }^{\circ}\text{C}$

PART NUMBER	TYPICAL TOTAL INCLUDED ANGLE ^[1] $\theta_{0.90V}$	TYPICAL VIEWING ANGLE ^[2] $2\theta_{1/2}$
A1DK - O612L	140°	110°
A1DK - R620L	140°	110°

Notes for Table 2:

1. Total angle at which 90% of total luminous flux is captured.
2. Viewing angle is the off axis angle from lamp center line where the luminous intensity is $\frac{1}{2}$ of the peak value.

Electrical and Thermal Characteristics

Table 3. Electrical and thermal characteristics for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25\text{ }^{\circ}\text{C}$

PARAMETER	PERFORMANCE
Forward Voltage, V_f	2.5V
Electrical Thermal Resistance, $R_{th-j-c\text{ electr}}$ ^[2] (Maximum)	40 $^{\circ}\text{C/W}$
Real Thermal Resistance, $R_{th-j-c\text{ real}}$ ^[3] (Maximum)	53 $^{\circ}\text{C/W}$
Temperature Coefficient of V_f , $I_f = 140\text{ mA}$, $10\text{ }^{\circ}\text{C} \leq T_c \leq 115\text{ }^{\circ}\text{C}$	-3.5mV/ $^{\circ}\text{C}$

Notes for Table 3:

3. All values are typical unless otherwise stated.
4. $R_{th-j-c\text{ electr}}$: Electrical thermal resistance (junction to case).
5. $R_{th-j-c\text{ real}}$: Real thermal resistance (junction to case) with wall plug efficiency included. Reference JESD51-51, JESD51-14, 4.1.3.

Absolute Ratings

Table 4. Absolute ratings for SignalSure 140

PARAMETER	PERFORMANCE
Minimum DC Forward Current	5 mA
Maximum DC Forward Current	300 mA
Maximum Junction Temperature ^[1]	135 °C
Operating Case Temperature at Test Current ^[1]	-40 °C to 115 °C
Operating Case Temperature at Maximum Current ^[1]	-40 °C to 115 °C
Storage Temperature	-40 °C to 115 °C
Soldering Temperature	JEDEC 020c 260 °C
Allowable Reflow Cycles	3
Minimum ESD performance ^[2]	2 kV HBM (Class 2), 1 kV CDM (Class III)
Reverse Voltage (V _r)	-10 V

Notes for 4:

1. Proper current derating must be observed to maintain junction temperature below the maximum, so that the LED is maintained below the maximum rated operating case temperature. SignalSure LEDs driven at or above the maximum rated operating case temperature may have shorter lifetime.
2. Measured using human body model (per ANSI/ESDA/JEDEC JS-001-2010) and charged device model (per JESD22-C101F).

Product Bin and Labeling Definitions

Designing with SignalSure

Flux bins supportable for car programs depend on product color and program start- and end-of-production date. Flux roadmaps by year and product color are maintained and available from the sales representative. Please contact your local sales representative to request the flux bin range with best supportability for program timing.

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheets. For this reason, Lumileds bins the LED components for luminous flux, color and forward voltage.

SignalSure 140 LEDs are labeled using a 5-digit CAT code following the format below:

A a B C c

- A a** – designates the high current (A) and low current (a) luminous flux bin
- B** – designates color code (example: 3 = 612 nm to 620 nm)
- C c** – designates the high current (C) and low current (c) forward voltage bin

Luminous Flux Bins

Table 5 lists the standard luminous flux bins for SignalSure 140 emitters. Product availability in a particular bin varies by color and platform start-of-production date. Contact your local sales representative for best supportability of programs.

Table 5a. Luminous flux bin definitions for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25^\circ\text{C}$

BIN	LUMINOUS FLUX (lm)	
	MINIMUM	MAXIMUM
H	13.2	15.3
J	15.3	17.8
M	17.8	20.6
N	20.6	23.9
P	23.9	27.7
R	27.7	32.2

Notes for Table 5a:

1. Lumileds maintains a tolerance of $\pm 6.5\%$ on luminous flux measurements.

Table 5b. Luminous flux bin definitions for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25^\circ\text{C}$

BIN	LUMINOUS FLUX (lm)	
	MINIMUM	MAXIMUM
h	0.33	0.41
j	0.41	0.52
m	0.52	0.65
n	0.65	0.81
p	0.81	1.03
r	1.03	1.30
u	1.30	1.62

Notes for Table 5b:

1. Lumileds maintains a tolerance of $\pm 6.5\%$ on luminous flux measurements.
2. Applies to dual binning option only

Table 5c. Luminous flux bin definitions for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25^\circ\text{C}$

BIN	PAIRING BIN
140 MA	5mA
J	h, j, m
M	j, m, n
N	m, n, p
P	n, p, r
R	p, r, u

Notes for Table 5c:

1. Applies to dual binning option only

Color Codes

Table 6. Color code definitions for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25\text{ }^{\circ}\text{C}$

CODE	DOMINANT WAVELENGTH (nm)	
	MINIMUM	MAXIMUM
3	612	620
6	620	627

Notes for Table 6:

1. Lumileds maintains a tolerance of $\pm 0.5\text{nm}$ on dominant wavelength measurements.

Forward Voltage Bins

Table 7a. Forward voltage bin definitions for SignalSure 140 at 20 ms MP, 140 mA, $T_j = 25\text{ }^{\circ}\text{C}$

BIN	FORWARD VOLTAGE (V_f)	
	MINIMUM	MAXIMUM
A	1.90	2.05
B	2.05	2.20
C	2.20	2.35
D	2.35	2.50

Notes for Table 7a:

1. Lumileds maintains a tolerance of $\pm 0.06\text{V}$ on forward voltage measurements.
2. Applies to dual binning option only.

Table 7b. Forward voltage bin definitions for SignalSure 140 at 20 ms MP, 5mA, $T_j = 25\text{ }^{\circ}\text{C}$

BIN	FORWARD VOLTAGE (V_f)	
	MINIMUM	MAXIMUM
a	1.65	1.71
b	1.71	1.77
c	1.77	1.83
d	1.83	1.89
e	1.89	1.95

Notes for Table 7b:

1. Lumileds maintains a tolerance of $\pm 0.06\text{V}$ on forward voltage measurements.
2. Applies to dual binning option only.

Mechanical Dimensions

Figure 8. Mechanical dimensions for SignalSure 140

Notes for Figure 8:
1. Drawings are not to scale.
2. All dimensions are in millimeters.

Reflow Soldering Guidelines

Figure 9. Visualization of the acceptable reflow temperature profile as specified in Table 8

Table 8. Reflow profile characteristics for SignalSure 140

PROFILE FEATURE	LEAD FREE ASSEMBLY
Preheat Minimum Temperature (T_{smin})	150 °C
Preheat Maximum Temperature (T_{smax})	200 °C
Ramp-Up Rate (T_p to T_L)	3 °C / second maximum
Preheat Time (t_{smin} to t_{smax})	60 to 180 seconds
Liquidous Temperature (T_L)	217 °C
Time Maintained Above Temperature T_L (t_L)	60 to 150 seconds
Peak / Classification Temperature (T_p)	260 °C
Time Within 5 °C of Actual Peak Temperature (t_p)	20 to 40 seconds
Ramp-Down Rate (T_p to T_L)	6 °C / second maximum
Time 25 °C to Peak Temperature	8 minutes maximum

Notes for Table 8:

1. All temperatures refer to the application Printed Circuit Board (PCB), measured on the surface adjacent to the package body.

JEDEC Moisture Sensitivity

Table 9. Moisture sensitivity levels for SignalSure 140

LEVEL	FLOOR LIFE ^[1]		SOAK REQUIREMENTS STANDARD	
	TIME	CONDITIONS	TIME	CONDITIONS
3	168 Hours	≤30 °C / 60% RH	192 Hours +5 / -0	85 °C / 60% RH

Notes for Table 9:

1. Shelf life 1 years.

Solder Pad Design

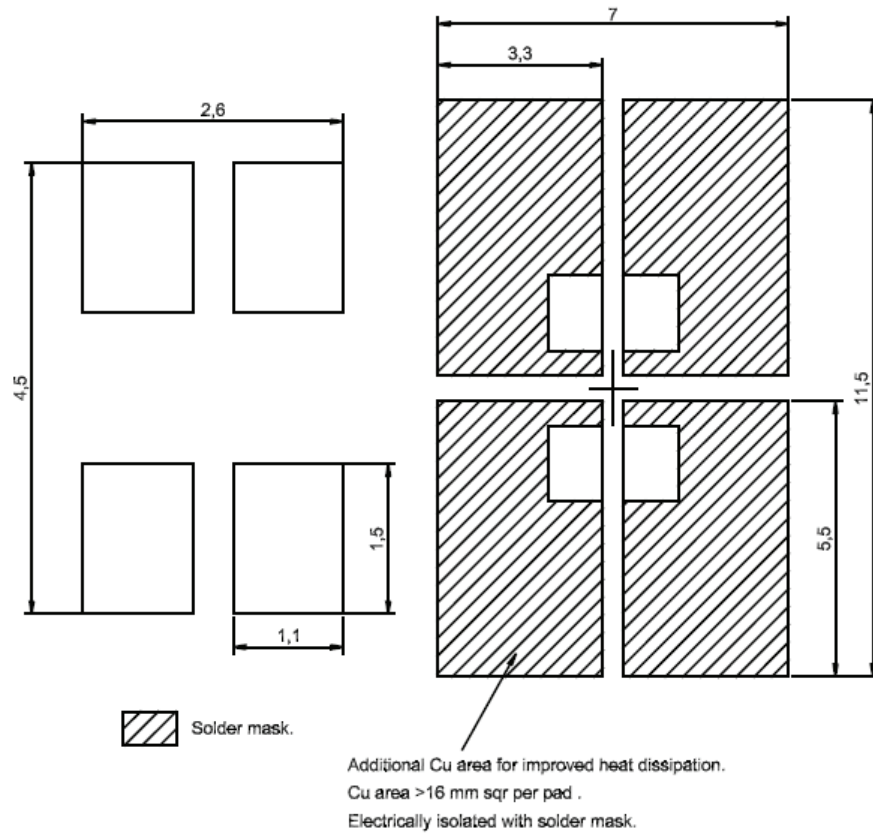

Figure 10. Recommended solder pad layout for SignalSure 140

Notes for Figure 10:

1. The drawing shows the recommended SignalSure 140 layout on Printed Circuit Board (PCB).
2. All dimensions are in millimeters.

Packaging Information

Pocket Tape Dimensions

Figure 11. Pocket Tape dimensions for SignalSure 140

Reel Dimensions

Figure 12. Reel dimensions for SignalSure 140

Notes for Figures 11 and 12:

- Notes for Figures 11 and 12:
1. Drawings are not to scale.
2. All dimensions are in millimeters.

Product Labeling

SignalSure 140 LEDs are packaged in moisture barrier bags on reels. Both moisture barrier bag and reels have printed information providing part numbers with CAT codes that indicate luminous flux bin, color bins and forward voltage bins.

Figure 14. Example of a product reel label

About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world safer, better and more beautiful—with light.
