

## LUXEON 3D LED

New styling opportunities for decorative car-body signature lighting

LUXEON 3D LED opens up new possibilities for car-body signature lighting in space-constrained environments that require homogeneous illumination. Versatile brightness levels provide flexibility for a broad variety of styling designs. The soft, flexible, silicone-based structure promotes pedestrian protection at the front of the vehicle.

### FEATURES AND BENEFITS

- Extremely compact form enables integration into previously inaccessible areas of the car body
- Smart optical design and universally bendable light source can adapt to a wide variety of 3D shapes while maintaining a consistent appearance from any angle
- Segmented animation provides a simple solution for dynamic lighting scenarios
- Easy handling and assembly due to integrated thermal, mechanical, and optical design
- Robust architecture allows minimal protection of the light source
- Soft materials help meet pedestrian-protection requirements

### PRIMARY APPLICATIONS

- Decorative car-body lighting
- Grille illumination
- Animated welcome-scenario lighting
- Position light, daytime running light (DRL)
- Front turn, rear turn
- Tail, stop, center high-mounted stop light (CHMSL)

# LUXEON 3D LED product-family specification

3D LED is an elongated light source that is bendable in both y- and z-directions and can be twisted in x-direction. The length of each strip is customizable to 45 cm maximum. Multiple 3D LED strips can be optically combined to achieve a seamless connection.

## Mechanical dimensions

### Static version

### Dynamic version

For illustration purpose, displayed as electrical interface are JST-SJN connector for the static version and JST-SAN connector for the dynamic version. Both can be applied for either version without mixing of variants.

## Cross sections

### JST-SAN

### JST-SJN

LUXEON 3D LED: grille illumination demonstrator (slice view)

## Mechanical flexibility

## Animation capabilities

- The dynamic version is segmented into five individually addressable segments, typically ranging from 5 cm to 9 cm maximum.
- Each segment can be powered individually within a specified current range from 30 mA to 60 mA per LED to achieve smooth gradients.

## Thermal specifications

$$T_{\min} = -40\text{ }^{\circ}\text{C} \quad T_{\max,op} = 105\text{ }^{\circ}\text{C} \quad T_{\max,storage} = 125\text{ }^{\circ}\text{C}$$

## Product portfolio range

Color	Lum. flux	Illuminance	Homogeneity	Static version			Dynamic version		
				$V_f$	$I$	SOP	$V_f$	$I$	SOP
Cool White	850 lm	270 cd	> 90%	9 V	900 mA	released	27 V	300 mA	Q4/2022
PC Amber	540 lm	170 cd	> 90%	9 V	900 mA	Q4/2022	27 V	300 mA	Q4/2022
Red Orange (615 nm)	320 lm	100 cd	> 95%	7.5 V	900 mA	Q4/2022	22.5 V	300 mA	Q4/2022
Long Red (630 nm)	200 lm	65 cd	> 95%	7.5 V	900 mA	Q4/2022	22.5 V	300 mA	Q4/2022
Super Red (635 nm)	150 lm	45 cd	> 95%	7.5 V	900 mA	Q4/2022	22.5 V	300 mA	Q4/2022
