

# LUXEON Versat 3030 0.5 W CoolWhite

## Optical Rayset Readme

Data: March 30th, 2017  
Updated: Nov. 30th, 2020

# LUXEON Versat 3030 0.5 W CoolWhite

## Coordinate system

Top view

Side view

**CAD file and rayset files share the same coordinate system,  
the origin is marked by the red dot in the sketches above:**

xy center == center of light emitting area  
z=0 plane == top edge of light emitting area

# LUXEON Versat 3030 0.5 W CoolWhite

Luminance distribution at  $z = 0$  mm

Size of distribution (FWHM) =  $0.63 \times 0.76 \text{ mm}^2$

The two orthogonal lines in the image mark the reference planes of the two cross sections.

# LUXEON Versat 3030 0.5 W CoolWhite

## Luminous intensity distribution

Normalized intensity for vertical and horizontal slices  
with lambertian cosine as reference

# Download File Nomenclature (see next slide)

## Example

LUXEON\_Altilon\_SMD2\_1x4\_gen4plus\_20190206\_20Mray\_proj\_Z\_spectral\_LT.ray

**Product Name**

**Reference Date**

helps identifying underlying dataset

**Number of rays**

e.g. 20 M =  $20 \cdot 10^6$  rays

**Ray starting points**

'proj' indicates that ray starting points have been **projected** onto the CAD surface (---).

**Spectral range**

$\begin{Bmatrix} Y \\ Z \\ - \end{Bmatrix} = \begin{Bmatrix} \text{only yellow} \\ \text{only blue} \\ \text{full} \end{Bmatrix}$  spectrum taken into account

**Spectral Information**

$\begin{Bmatrix} \text{spectral} \\ - \end{Bmatrix} = \text{individual rays } \begin{Bmatrix} \text{do} \\ \text{don't} \end{Bmatrix} \text{ carry wavelength information}$

**Target Software Package**

LightTools (LT), ASAP, Zemax, ...

**File Extension**

## Additional Application Notes

### Randomization

In some cases, reducing the number of rays in a rayset might be desirable. In order to facilitate the generation of reduced raysets, **all raysets mentioned in this readme file are randomized**. Hence, a rayset having 5 million rays (5M) can simply be generated by taking the first 5M rays from 20M rayset.

### Projected Raysets: Propagated ray starting points

For projected raysets, the following procedure is applied for obtaining the starting points:

- (1) Project rays on CAD surface (---) → ray starting points
- (2) Propagate rays by 0.5  $\mu\text{m}$  → propagated starting points (•)

**All raysets mentioned in this readme file provide propagated starting points.**

If raytracing includes the LED CAD, unpropagated rays are prone to be blocked at the surface. Rays with propagated starting points should not suffer from this problem.
